

Business and financial performance management

Evoke360 rockerbox® provides robust financial analytics that deliver actionable insights to meet today's healthcare management challenges in value-based care models. rockerbox, part of Evoke360's platform, enhances business performance for payers and provider organizations by improving cash flow management and profitability.

Designed for finance and medical economics teams, rockerbox manages complex risk arrangements with intelligent reporting to allow instant viewing of financials adjudicated for any condition across all contracts.

Our solution navigates complex clinical and financial data to manage shared financial responsibility.

Eliminate a multitude of spreadsheets and automate manual processes to improve decision-making and effectively manage financial performance. Access and integrate data in any format and from any source.

Track and monitor trends for MLR, enrollment, utilization, referral patterns, member outcomes, and provider performance.

Our proprietary algorithm for predictive analytics identifies and targets patients at risk for adverse events, allowing you to act upon and avoid preventable costs.

Risk ledger manager allows you to quickly produce financial reconciliation and provider payment summary for individual providers or provider groups.

About DataLink

DataLink LLC is a leading healthcare technology company dedicated to empowering better health. Grounded in more than 20 years of experience, DataLink develops integrated solutions that deliver actionable data insights, automated workflows, and advanced interoperability.
