

## Your partner for value-based care

Shifting from volume to value is challenging and complex. DataLink simplifies value-based care, so you can focus on what matters most: **delivering the best outcomes.**

With decades of experience supporting the transition to value, we provide trusted expertise combined with innovative solutions to support payers and risk-bearing providers with value-based models of care.

### Scalable solutions that simplify value-based care

#### Tap into our team of value-based care experts

Our dedicated VBC team of certified coders, clinicians, and former provider engagement managers serves as an extension of your team to support your quality performance and risk score accuracy goals. From provider engagement to gap closure, you can rely on our team to support your strategic objectives.

#### Engage in a single value-based care platform

Evoke360 brings all stakeholders together into a single platform with data insights and automated workflows to close gaps in care, prospectively, retrospectively, and at the point of care.

# Transform the delivery of care, improve the health of your population, and lower the total cost of care.

## Streamline clinical data collection

With EvokeConnect, we have the ability to connect with 95% of your provider network, seamlessly accessing richer, more accurate data for both quality measurement and accurate risk adjustment for value-based care programs.

## Effectively manage cash flow for value-based care contracts

Evoke360 rockerbox normalizes complex clinical and financial data across multiple arrangements to successfully manage shared financial responsibility whether you're a payer or a risk-bearing provider organization.

## Enable providers to focus on value

Our 2015 Cures Edition certified EvokeEHR was designed by providers for value-based care with automated workflows to capture all diagnoses and procedures allowing you to accurately code for quality measures and risk adjustment.

### Why DataLink

- ✓ 20+ years supporting healthcare organizations
- ✓ 100% NCQA certified for all HEDIS measures
- ✓ 95% EHR connectivity
