

Improve quality performance and outcomes with DataLink

Use actionable data that increases the opportunity for optimal health outcomes.

With our suite of quality solutions, your team is empowered to close gaps in care, prospectively and retrospectively, while engaging more closely with providers to manage quality and contain costs at the point of care.

Here's how we do it.

One platform for quality improvement

Evoke360 enables payer-provider collaboration into a single platform for data insights, improving clinical and quality outcomes.

Data insights

Quality management: Analyze quality measures and use automated workflows to identify and close gaps in care prospectively, at the point of care, and retrospectively.

Wellness assessment: Empower providers to capture data and meet both CMS and plan-specific requirements with SmartVisit, a prepopulated wellness visit form.

Utilization management: Identify key trends of your provider network and population to target areas for better, more effective utilization and quality performance.

Provider relationship management: Effectively manage engagement team members and provider networks to drive best practices and improve performance.

Improve quality performance and outcomes with DataLink

Data-driven solutions to empower better outcomes

DataLink delivers data-driven solutions to support federal, state, and accredited quality measurement programs.

Clinical data extraction

Seamlessly extract electronic health record data to improve quality performance by closing gaps for HEDIS®, Star Ratings, state-specific, and other quality measures important to your organization.

HEDIS reporting and submission

Measure, run, and submit standard and custom measures for all lines of business — Medicare, Medicaid, commercial, exchange — with our simple end-to-end NCQA-certified solution.

Provider engagement

Leverage our team of industry experts to increase provider adoption of quality programs and our technology to improve overall performance.

Ready to optimize quality for your organization?
