

# Ensure accurate risk and corresponding reimbursement with DataLink

Our risk-focused solutions help you gain valuable understanding and data insights to accurately report the risk scores of your population.

**Here's how we do it.**

## One platform for risk adjustment

Evoke360 enables payer-provider collaboration into a single platform for data insights, improving risk accuracy.

### Data insights

**Risk adjustment:** Ensure appropriate risk scores and risk accuracy by identifying unreported and under-reported risk-adjusted conditions.

**Business and financial performance management:** Navigate complex clinical and financial data to manage shared financial responsibility in risk arrangements.

**Wellness assessment:** Empower providers to capture all chronic conditions and meet CMS requirements with SmartVisit, a prepopulated wellness visit form.

**Provider relationship management:** Effectively manage engagement team members and provider networks to drive best practices and improve performance.

**Referral and encounter management:** Eliminate billing errors and avoid unnecessary costs to reduce the total cost of care.

# Ensure accurate risk and corresponding reimbursement with DataLink

## Data-driven solutions for appropriate risk accuracy

Leverage DataLink's risk adjustment solutions to deliver the most accurate risk scores while providing high-quality, cost-effective care.

### Clinical data extraction

Seamlessly pull and analyze data inside a chart in near real-time, accessing data that's often missed in the claims process. **The result:** Richer, more accurate data for all your other risk adjustment programs, allowing them to be more targeted and less wasteful.

### Risk adjustment analytics

Ensure accurate risk adjustment with robust analytics and insights for the most effective targeting, providing the biggest impact.

### Advisory services

Leverage our team of industry experts to access data analysis and guidance for risk adjustment and provider engagement.
