Empower Better Outcomes With Data–Driven Insights

DATALINK

empowering better health

datalinksoftware.com

Simplifying value–based care

At DataLink, we recognize and resolve the multitude of challenges in today's value-based care models. With intelligent insights, automated workflows, and advanced interoperability, we simplify value-based care so payers and provider organizations can focus on what matters most: delivering the best health outcomes.

Improve quality performance
Use actionable data that increases the opportunity for optimal health outcomes.

Optimize risk accuracy
Capture more complete diagnoses, document care, and ensure appropriate reimbursement.

Achieve financial success
Demonstrate your organization's value to improve financial positioning in shared savings and risk arrangements.

Evoke360

One platform for all value–based care stakeholders.

Our easy-to-use platform enables collaboration to improve quality performance and optimize risk accuracy, resulting in better outcomes and healthier members and patients.

Data insights solutions

■ **Quality management**
Improve quality performance with actionable data insights to close gaps in care prospectively, at the point of care, and retrospectively.

■ **Risk adjustment**
Optimize reimbursement and improve recapture rates while ensuring RADV audit compliance.

■ **Utilization management**
Uncover opportunities to reduce out-of-network, hospital, and specialist utilization by understanding key cost drivers.

■ **Business and financial performance management**
Improve cash flow management and profitability by effectively managing value-based care contracts.

Point–of–care solutions

■ **Provider relationship management**
Access actionable data insights to improve provider engagement and value-based care contract performance.

■ **Referral and encounter management**
Control costs by effectively managing member referrals and ensuring accurate claims coding.

■ **SmartVisit**
Improve quality at the point of care by capturing all necessary value-based care data during a wellness visit.

Think of Evoke360 as your one–stop, comprehensive solution to improve quality, optimize risk adjustment, and empower better outcomes.
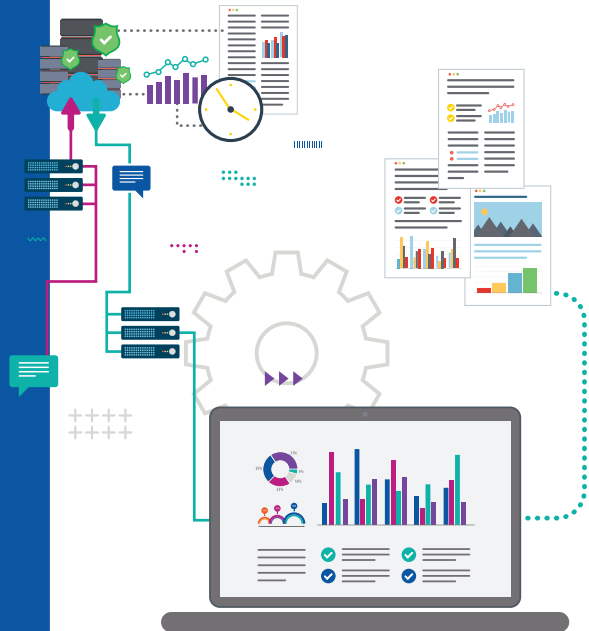

Data–driven solutions

Our suite of flexible, data-driven solutions allows stakeholders to focus on their core mission to serve members and patients while improving health outcomes.

Evoke**Connect**

Experience true data interoperability.

EvokeConnect integrates with multiple, disparate clinical data sources to retrieve, aggregate, and share HCC capture information. It helps close more gaps in care and ensure accurate risk adjustment while improving health outcomes.

Evoke**EHR**

Save time and focus more on delivering quality care.

EvokeEHR was designed by providers for value-based care with automated workflows to fully capture all diagnoses and procedures. Now you can identify and accurately code for quality measures and risk adjustment at the point of care.

Advisory**Services**

Lean on our value–based care expertise to empower better health outcomes.

Our team provides dedicated support, consulting services, and staff augmentation to improve quality and optimize risk accuracy.

Quality measures analytics

As an NCQA-certified vendor, you can rely on us for accurate HEDIS® calculations for all measures and analytics to improve quality performance.

Risk adjustment analytics

Turn to our experts for medical risk adjustment analytics and accurate RAF score calculations to improve reimbursement and ensure score and payment accuracy.

VBC services

Our experienced value-based care team provides the experience, education, and strategies you need to help close gaps, capture/recapture HCCs, and streamline workflows within Evoke360.

5:1 ROI

Significantly improved operational and financial performance

Our partners experience an average 5:1 return on investment as verified by FTI Consulting.

DATALINK
empowering better health

DataLink Software is a leading healthcare technology company dedicated to empowering better health. Grounded in more than 20 years of experience, DataLink develops integrated solutions that deliver actionable data insights, automated workflows, and advanced interoperability. This streamlined delivery of value-based care improves quality performance, optimizes risk accuracy, and reduces costs. DataLink is rated a Top 10 Population Health Management Solution Provider by Medhealth Outlook.
